

Farm Talk

Howard Sharp

Dade County Tomatoes

Believing that a new variety of tomato is not subject to head-rust, growers in Dade county are preparing to plant heavily. One estimate of the acreage is 18,000, which if planted will equal the best years in that county. Dade county tomatoes are planted to come off in February and March and be out of the way before the Lake Okechobee crop comes off in April and May.

Packing House Site

Worship, who bought tomatoes last season from the W. H. Vain house, is negotiating for a site for a packing house to be erected and operated by a Chicago commission firm, Dr. Schwarz and E. J. Sharon and associates, who are being sections 9 and 17 from the Okelanta, Corporation, will have a packing house for fruit grown on their property. Peterson & Whidden will have a new house, to replace the one that was blown down during the July storm. Interest in packing houses at this early date indicates that a big acreage of tomatoes is expected.

Grain and Sterility

Investigation has shown that sterility in women is overcome in many cases by a diet of grain, preferably wheat. There is a saying, Bread is the staff of life. In its original and correct form the wheat or grain is used instead of bread. A Latin race calls its national dish, a gruel made of coarsely ground wheat. Immigrants of this gives a hint as to the cause of sterility in such cows in the Everglades as are pastured on grasses in the weed land section a subject that is being investigated by a specialist of the Everglades experiment station at Belle Glade. A. Hanson, the dairyman at Pahokee, says none of his cows have ever proven sterile. His pastures are mixed grasses in the custard apple belt.

Demand For Peanuts

Proposition to put in a peanut hulling plant has been made to persons who own land in the Lake Harbor and Rita section, Dr. T. L. Taton reports. He lives at Lake Worth and has land near the lake and Miami canal. The last issue of the U. S. Department of Agriculture's "Crops and Markets" reports the 1926 acreage of peanuts, for the country to be less than in 1925 and in the condition of the growing crop to be 10 percent below the average and the estimated per acre and total yield for 1926 is lower than in 1925. Importation from China has been high although

there is a duty. The muck soil of the Glades gives large yield of good peanuts and as peanuts is a superior cover crop for the summer months, growers are advised to consider the matter of planting peanuts when the tomato crop is off.

Will High Water Kill or Promote Bacteria?

Will the water that is now on a good deal of the land on the southeast side of the lake hurt or help? Some farmers say the soil will be water-logged or soured or the bacteria destroyed and they are afraid they will not get good crops next season.

There is some reason for these fears because of experiences in the past, but I do not think much if any injury will be done, and the reason I think I do is because the experience this year is not like the experience of other years.

This year it is lake water that overflows the land; but in other years it was water that backed up on to the custard apple land from the sawgrass land.

The lake water is fresh and pure and it probably spread bacteria and silt instead of destroying bacteria.

In other years the canal got bank-full and ran over and overflowed, the lake in the middle Glades and spread to the ridge. In running over the sawgrass land the water became impregnated with the poisons and carried the poisons to the custard apple land and where the water evaporated or ran off it left the salts in the ground. I do not think this happened this year. We will all hope not, anyway.

It seems to me likely that this high water may do some good, for it may wash the poisons out.

The whole trouble is the lack of outlet for the drainage canals; the water must be allowed to run off to the ocean and carry the poisons off. Building dikes around the lake does not provide drainage.

Here I am running on and saying as a fact that there are poisons in the sawgrass land, just as if it was known to all or admitted by all. Well, it is believed by most of us that there are poisons in the sawgrass land. When water comes into West Palm Beach canal from the sawgrass land (it is of brownish color and thousands of fish float belly-up. Not all of the fish are dead; when they get to the fresh water of the lake many of them revive, which leads us to think they were killed or made sick by whatever it was that discolored the water in the canal. Anything that will kill a fish or make it sick is not good for beans and tomatoes.

Free Seed In St. Lucie

FORT PIERCE, Aug. 26.—County Agent Alfred Warren has just received two dozen packages of Marglobe tomato seed from the United States Department of Agriculture which he is going to distribute among the various tomato growers in St. Lucie county. This particular tomato is of excellent quality and has unusually strong resistance to the nailhead rust which has given considerable trouble in this section. It proved to be the salvation of the Dade county growers last season.

Gulf State Peppers

About 2,650 acres of sweet peppers are estimated for Louisiana this year with a production forecast of 32,750 hampers based on a yield of 115 7-8 hampers per acre. In Mississippi there are 205 acres of sweet peppers in Copiah county, with a production forecast of 19,885 hampers based on a probable yield per acre of 97 hampers. There are about 700 acres of hot peppers in Louisiana and 100 acres in Wilkinson county, Mississippi. The production of sweet peppers will be about 80,700 hampers in Louisiana and 9,200 in Mississippi—U. S. Dept. of Agriculture Report.

California Lima Beans

Sales for the California Lima Bean Growers' Association of Oxnard, were \$4,630,713 for the last year, according to a report prepared under date of July 7, 1926. Of the total amount, \$3,542,290 came from the sale of 33,575,956 pounds of regular Lima beans and \$1,088,423 from the sale of 10,353,389 pounds of baby Limas. Approximately 76 per cent of the beans handled were regular Limas and the receipts from the sale of these beans were about 76 per cent of the total receipts.

The association's expenses of marketing were \$104,687, or less than 4 per cent of the f. o. b. sales value. The growers' local associations, therefore, received over 96 per cent of the total receipts. The larger items making up the total of expenses were: Brokerage, \$38,411; district and exchange, \$36,538; storage, \$29,845; general administration and selling, \$23,728. Some of the other expense items were: Insurance, \$7,753; inspection, \$7,446; taxes, \$4,087; telephone and telegraph, \$4,500.

The net returns to the various local units of the California Lima Bean Growers' Association for the 1925-26 season were \$3,417,025 for regular Limas and \$1,049,001 for baby Limas. These figures represented a return of \$10.17 and \$10.13 per 100 pounds.

Bulbs—Again

An article that has been printed in many Florida papers says E. W. Penney, publisher of Philadelphia, Pa., has invested \$221,000 in 150 acres of bulb land in the vicinity of the town of National Gardens, located on the Florida East Coast railroad 10 miles north of Daytona Beach, and \$200,000 in locally-produced bulbs, planting of which begins in October.

Development of the bulb industry is desirable but it cannot be accomplished in a few months or in newspapers. I don't believe Mr. E. W. Penney, publisher of Philadelphia, Pa., has paid \$221,000 for 150 acres of land at that place for the purpose stated and I do not believe he has paid \$200,000 for bulbs produced there. I don't believe any man who has sense enough to accumulate \$421,000 would spend that sum at one fell swoop when a tenth of it would furnish ample opportunity for test of practicability of the project and still leave plenty of time to put the rest of the money in when the test had proved satisfactory.

The clipping has been put in my file and indexed for reference to it in the 21st of August, 1927, when I will make inquiry and see what happened in the meantime.

SUE FOR DRAINAGE TAXES
VERO BEACH, Aug. 26.—Acting upon instructions from the board of supervisors of the Indian River Farm drainage district, F. L. Hemmings, attorney for the district, announced September 1 as the date on which foreclosure action will be started on all property on which drainage taxes are unpaid.

According to Martin Ruch, secretary of the board of supervisors, it is necessary for this action to be taken in order to avoid defaulting on the interest payment on the bonds. The work of cleaning out canals and ditches has been practically suspended and cannot be resumed until sufficient tax payments are received.

NOTICE OF APPLICATION FOR TAX DEED

Under Section 777 of the Revised General Statutes of Florida
Notice is hereby given that J. Mulligan purchaser of Tax Certificate No. 3685, dated the 2nd day of July A. D. 1923, has filed said certificate in my office and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property, situated in Palm Beach County, Florida, to-wit: S 50 ft. N 150 ft. of lot 4 M. K. Lyman, sub-division of N 300 ft. of Gov. lot 4 section 3, township 45 south, range 43 east. The said land being assessed at the date of the issuance of such certificate in the name of John McFarley. Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 25th day of September, A. D. 1926.
Witness my official signature and seal this 12th day of August, A. D. 1926.
(Seal)
Fred E. Fenn, Clerk Circuit Court, Palm Beach County, Florida.

SEEDS

OUR NEW STORE BUILDING

will be completed within a few days, at which time we will have a complete stock of seeds and supplies for the fall. When this building is completed and equipped, we will be in better position than ever to serve our customers.

At present time we have stock of Pepper, Eggplant, Tomato and various garden seeds on hand at our old stand ready for immediate delivery. Our representative is also there on the ground between Canal Point and Pahokee and will accept orders and see that they have prompt wire handling and quick delivery out of Plant City.

All orders which have been booked for future planting, will be on hand at the proper time ready for delivery as soon as new building is completed, but where desired immediately, write Plant City or see our representative there and quick delivery will be made from Plant City.

If you have not received our new beautiful and instructive fall catalogue, write for it.

KILGORE SEED COMPANY

BETWEEN

CANAL POINT and PAHOKEE

ADDITION TO BUILDING AND LARGER ENROLLMENT AT PAHOKEE SCHOOL SINCE THIS PICTURE WAS MADE LAST YEAR

PAHOKEE

Pahokee, June 2, 1925.

We want a hard surface road from Canal Point to Bacom Point right away.

A. KALTENBRUNER.

PAHOKEE, Fla., Sept. 1.—A class of forty-nine candidates of the Woodmen of the World was presented to the state manager last Monday night at 7:45 in the Methodist church. Delicious refreshments of ice cream and cake were served by the Woodmen by the Woman's Club of Pahokee at their club house at 9 o'clock. Initiatory work was resumed immediately thereafter, degrees conferred by Okeechobee degree team. There was a large number of the Okeechobee Woodmen in attendance.

Miss Hattie Bell was the guest of Miss Sarah Hanson the past week. Henry Larrimore returned home from Moore Haven early Sunday morning.

W. O. Tiffin and family have been spending a few weeks in Pahokee lately.

Ralph Stalings left here Wednesday for Belle Glade, where he will work on a dragline.

C. A. Shive and family spent a few days last week at Gretna, where Mr. Shive was employed, finishing his

house at that place. Mr. and Mrs. Duncan Padgett were also with them. Miss Christine Lee, who has been visiting Mrs. E. G. Kilpatrick and Miss Hilda Lee, will return to her home in Marianna, Friday.

The dredge men, who are working on the Pahokee ship are rooming at the Pahokee Inn.

T. G. Dickson, Jr., made a business trip to Okeechobee Wednesday for the Elliott & Robison garage.

Bob Schroeder, who has been in the hospital at West Palm Beach for a few days, returned here last Saturday.

Mr. and Mrs. T. W. Jenkins and family of Miami visited their relatives, Mr. and Mrs. W. A. Moody Sunday.

Mr. and Mrs. Walter Lowe are home again, after having spent several months very pleasantly visiting in Pennsylvania.

Mr. and Mrs. Fred Tiffin and children spent the past three weeks in Moore Haven. They returned home early Sunday morning.

Mr. and Mrs. A. Kaltenbruner have purchased a cottage near Hendersonville, N. C., where they have been spending several months. They expect to return to their home here soon.

Frank Friend made a trip to West Palm Beach Monday on important drainage business. He was accompanied by Mrs. Friend, Miss Lula Barfield, Mrs. H. C. Graham and Miss Wilda Friend.

John S. Gray spent the week end here with his folks.

M. G. Gamage spent the week end in Arcadia with his family.

Of a large group of persons who fished at the St. Lucie lock Monday

Mrs. George Crawford was the most successful mullet catcher, catching four with a hook and line.

Mrs. J. E. Roberts and her little daughter, Marian Josephine, of West Palm Beach have been spending the past week with Mrs. Roberts' parents, Mr. and Mrs. S. A. Barfield.

J. H. Cason has bought an interest in W. J. Larrimore's Pahokee store. Mr. Cason has been a resident of Pahokee for the past five years and has worked in and for practically every business house in Pahokee and is well qualified to look after the interest of his customers and friends.

Lieutenant E. B. Schlauf of Washington, D. C., spent the week end as the guest of friends here. He returned to West Palm Beach Sunday afternoon, accompanied by Dr. and Mrs. W. H. Schlauf is taking his vacation visiting his home here Monday, but Miss Everingham remained for a week's visit in West Palm Beach at the home of the Vivians.

EXOTIC SEED HOUSE

A frame building 10x30 is being built on the east side of Pahokee road by the Exotic Gardens as a temporary home for the seed business. The Exotic Gardens company owns the Culp place of which the site of the seed store is part. The larger part of the stock is carried at the warehouse in West Palm Beach.

ADVANCE

We are living in an age

That's advancing with great speed;

If we would reap the toiler's wage,

We must stay close to the lead.

If we fail to use our dome,

If we fall behind the rank,

Very shortly we will moan,

For we'll soon be groping lank.

We cannot continue in

The same old rut our fathers trod;

It could save them from their sin—

But it can't lead us to God.

—FRANK FRIEND.

Farming At Moore Haven

Mr. Galyean will be back the first of September to put in fall crops.

I. F. Babers is making preparation for a large acreage of vegetables this year.

Messrs. O. C. Benbow and Glenn Williams have gotten through harvesting a large crop of Egyptian wheat. Mrs. Williams says she is going into the chicken business this year.

Dad Gombol is busy with his dairy. He reports that his cows are paying splendidly and he is waiting to buy more cows.

Secretary Howard Fogg of the Chamber of Commerce bought several stands of bees from J. H. Whidden recently. He reports the honey in this part of Florida the best he ever ate.

NOTICE

The county registration books will open throughout the county on the first Monday of September and will remain open each week day to and including the 9th day of October, 1925.

Those falling to register during these dates will not have another opportunity to register until 1928 as the books will not be open again for two years.

J. L. GRIER,

Supervisor of Registration.

LARGER ENROLLMENT

Enrollment in the Pahokee grade school was 125 Wednesday, which is more than at the opening last year. The whole number enrolled last year was 123; this will be largely accepted in the term now starting.

CLEWISTON

CLEWISTON, Aug. 31.—Clewiston drainage district pumping station began operations today. This is one of the largest pumping plants in the Everglades drainage district. It has a capacity of 180,000 gallons of water per minute. There are two Wood screw pumps of 70,000 gallons per minute capacity each and one of 40,000 gallons all being operated by semi-Diesel engines, the larger pumps having engines of 180 horsepower each and the smaller one of 120 horsepower. Two of the pumps—the 40,000 gallon and one of the 70,000 gallon pumps—are reversible to provide sub-irrigation. This pumping plant is one of the important auxiliaries for draining the 43,000 acres of Sugarland drainage district.

When the rails of the line between Clewiston and Moore Haven spread under a heavy freight train one day this week Clewiston was shut off from road and rail communication for some hours. The grading of a stretch of the highway into Clewiston made it impassable for vehicles to get through. To solve the serious problem thus created R. S. Wilbur's yacht, the Thorobred, carried three passengers and a quantity of express and mail to Moore Haven through the inside small boat route and returning brought back two passengers and a very large amount of express and mail matter. One of the passengers was A. B. Cherry, a former resident of Clewiston who could not resist the lure and had to return.

On the way to Moore Haven the Thorobred passed the two pumping stations of Diston Island, both of which were in operation. On the return trip the craft struck something on the bottom of the channel where nothing ought to be and everybody was convinced from the convulsion of the water for the next several minutes that the Thorobred had a submerged alligator. It fit was he stayed submerged, all fit was a considerable disturbance took place about 20 feet from the boat a few seconds after the object was struck.

The situation which necessitated the use of the Thorobred on that day was, of course, only temporary as the grading of the highway is proceeding and some time this week it is expected a very fine road leading into Clewiston will be available. It has been possible grader was at work but not very desirable for heavy vehicles.

Captain F. Deane Duff returned to Clewiston Sunday on an extended trip through the north and will remain here for several weeks.

A number of representatives from Moore Haven, Fort Myers and LaBelle attending the Great Okeechobee-Atlantic Waterway Association meeting to be held at Okeechobee have been invited to travel by the place of the meeting on Clewiston on the Clewiston boats Queen of the Lake and the Thorobred. The boats will leave very early and return late. Their use in this way will be a special point in emphasizing the value of the waterway which the association is boosting.

Arnold Lowe has returned from a vacation in North Carolina.

Mr. and Mrs. D. O. Lowe and Charlie Lowe returned Sunday from a visit to relatives at New Smyrna.

County Engineer Boyd was out Monday from West Palm Beach for conferences with Resident Engineer Pickett and Contractor Holloway.

Miss Ruby Lowe returned Sunday a week ago after an absence of three months and left the following Sunday for Sanford.

Miss Thelma Thornton of Mullins, S. C., arrived Sunday to begin her duties as teacher of home economics and agriculture in the high school here.

Clifford McClelland has laid off of work at the Canal Point Garage and is driving the school bus between Canal Point and the north line of the county.

E. G. Prevatt, father of Mrs. Tom W. Lowe, who had visited relatives at Sand Cut jiding, left Tuesday afternoon for Ojus.

Miss Daisy Purley, of New Brunswick, Canada, and West Palm Beach, arrived Sunday to teach in the high school until a permanent teacher is secured. She will then teach in South Palm Beach.

Miss Lois Oliver of Gainesville, and Miss Eunice Swartz of Whigham, Ga., teacher in the Canal Point high school, arrived Sunday to begin the new school term. R. L. Gunn met them in Okeechobee and accompanied them to Canal Point.

C. P. Sheffield, foreman at the cane testing station, returned Monday from Miami, where he spent a two-weeks vacation with his family. He concluded the time was too short to make a trip to his old home in Tennessee, as he has thought to do.

Charley Stuckey, who was in charge of dragline work on a Martin county road, has been called back to work roads with the construction department of the F. E. C. railroad. He is operating a shovel at the borrow pit north of St. Lucie canal.

W. P. Weeks left Sunday for Lulu, Fla., called by news of the illness of his father. He had been here for five weeks, working with his brother, J. G. Weeks, the Standard Oil Company agent, and intended to stay permanently but the illness of his father makes

COMMUNITY GOSSIP

An employee of the telephone company explains that the extra long poles are for the high-toned conversation and not for the ordinary small talk.

A Canal Point man put on a clean shirt, buttoned the collar and put on a tie and looked no dressed-up than all of his acquaintances asked him if he was going to the county seat. He said he'd just come back; he'd been in the Bahamas, and then had to quit lying for he couldn't invent a reply to the question, "What is a golumpus?"

"I can't make out what yacht club flag that is," a near-sighted visitor to Canal Point said the other day as the bridges were being raised to admit a boat into the canal from the lake. It turned out the boat was the tug Morrow and that which was mistaken for a burgee was Captain A. S. Sheeler's red flannel undershirt hung out for an airing.

Says W. L. Brandon, who lives a mile or so north of Canal Point and who got back Friday night from a visit to Kansas:

"In the paper I received at Manhattan, Kansas, I read the request for information about location and ownership of lawn mowers in the Everglades. In the paper I received that there I've had a lawn mower in daily use at Canal Point for more than a year and Mr. Sharp doesn't seem to know about it."

Yes, the editor of the paper did know about it, but the purpose of opening the subject was to get people thinking and talking about the care of home grounds, and the device succeeded admirably.

Flying around here lately is something that looks like a grasshopper and a cricket and a grasshopper. A man who inquired was told they were July flies. That doesn't seem reasonable. The Everglades is sort of slow, but it is to have July flies they ought to be here in June, not in September.

Rainfall at Belle Glade experiment station from Monday, August 23, to Saturday, the 28th, amounted to a little more than 5 inches. At Ritta in the week ending August 28 the rainfall was 4 and a fraction inches, and at Moore Haven it was a bit more than 3 inches. The heaviest rainfall anywhere in the lake region in any one day was the 2 inches at Moore Haven on Friday of last week. At Canal Point the total for the week ending August 29 was 3.63 inches. The rainfall since January 1 at Canal Point is 5 1/2 inches under what it was at the same date in 1925—that is, it was 4.26 at the end of August, last year and was 37.03 at the end of August this year. Eleven inches is due to fall between now and the end of the year to make the average annual for this locality. The probability of the total being less than the average is as great as the probability of it being above the average.

IN THE NEWS

Food and the Body.—A physician in Europe says use of proper food will keep the teeth in good condition, and a news agency distributes his statement as if it was something that was not generally known. It ought to be widely known that drinking milk is an aid to prevention of tooth decay. Milk furnishes lime for the body. If lime is not furnished in food the system takes it out of the teeth. Eating fresh vegetables at the night the minerals that are needed to put the enamel on the teeth. If agriculture is not supported the nation will suffer.

The Public Schools throughout the country are opening, to be run on the same bad system they have been run since the Civil War. In schools where lunchrooms served, the first thing that ought to be taught to those not already trained is, Don't put food in your mouth with the knife. There is a reason for not using the knife to put food in the mouth with a knife, and when a child learns the reason he has learned a principle that will be helpful all through life. The reason is this: Everything should be used for its proper purpose, and in proper place—the knife is to cut the food with and for nothing else. The peoples of the primitive races who made attention to diet and care of the body a religious rite survive and their descendants established civilization.

DISTON ISLAND DISTRICT
MOORE HAVEN, Sept. 1.—No quorum being present at the adjourned meeting of the Diston Island drainage district land owners, the election of a supervisor for the ensuing three years was not had.

However, a detailed report of the construction work on the district to date was presented to the meeting and will be mailed to landowners.

AS IN OLD DAYS
"I was up at Fort Thompson hunting thirty years ago," said Senator C. A. Stadler this morning, "in weather like this, and we tied up our boat at the hotel porch. I was up there again yesterday, and it looked much the same, except that the hotel is a bit deserted and run down, but the country is under water just like old times." —Port Myers Press.

DEATH OF MRS. KATE B. KING
Mrs. Kate B. King, who operated the Altemonte Hotel at Moore Haven for several years, died August 21, at her home in Virginia. Burial was made August 24 at Taylorstown, Va. She sold the Altemonte last fall and with her daughter, Mrs. Stroop, intended to build a winter home at Citrus Center.

FILLING STATION
W. R. Shagford, owner of the Canal Point Garage, is erecting a building on his lot on Conners Highway two miles north of town and will put in a filling station.

I have for sale good farm tracts for trucking near Lake Okeechobee. Get in touch with me before you buy else where.—F. H. Friedman, Licensed Broker, Chosen, Fla.

Watch Ira York & Company's space next week for an important announcement.

Decoration
"That there new sweater of yours makes you look like a tattooed man!" remarked Farmer Cornstossel in deep contempt.

"That's the idea!" replied his boy Josh. "But the sweater has the advantage of being put on without hurting you."

INFORMATION
ABOUT THIS NEWSPAPER
Subscription, \$2.50 a year; \$1.25 for six months.

Devoted to news and affairs of the Florida Everglades and serving particularly the people in the towns and communities in the Upper Glades and on Lake Okeechobee.

Advertising rates: Display—45 cents per inch per week. Reading notices 10 cents per line. Want ads one cent a word. No display ad taken for space or number of insertions that amount to less than 25 cents.

Job Printing.—Letter heads, envelopes, cards, dogtags and all other forms of commercial printing. No printing job taken at a less price than \$2.

Politics.—Democratic.
Policy.—To try to be accurate and fair. Contributions stating views opposed to the views of the editor of the paper are desired more than contributions that agree with the editor's views.

Around The Great Lake

OKEECHOBEE

(Compiled From The News.)
L. C. Tottle, city water superintendent, is in receipt of a letter from E. L. Filby of the state board of health which contains an analysis of the water supply of the city of Okeechobee. Two samples of the water were mailed to the state board on August 23. The water was dipped up from the cistern at the water plant on the lakefront. Mr. Filby requested further samples for test each month.

Lon A. Hough & Co. are in receipt of word from Sperry Locke of Bangor, Me., that he will head a syndicate of capitalists who will leave that city September 3rd for Okeechobee for the purpose of buying several thousand acres east of the city for farm purposes. The deal has been going on between Hough & Co. and this syndicate for months. The syndicate is represented by several bankers and capitalists of Maine, who are prepared to make purchases of land belonging to the Hough company if the land is found desirable for the purposes they require. The syndicate represents potato farmers from Aroostook county, Maine, some 200 in number.

Bonds for the construction of the Eagle Bay road bridge, which is a portion of road 29, extending from Parrott avenue west to Kissimmee river, were delivered to the Peoples Bank of this city Tuesday afternoon. The bonds and the receipt of \$160,000 complete this transaction, the sale having been made about two months ago. Bids for the construction of the highway and the bridge across Eagle Bay will now be advertised, and it is hoped that the contract will be awarded before another month has passed and work on this important highway begun. A portion of the grade has already been constructed by county officials.

Setting poles for the high tension transmission wires from Fort Lauderdale, where one of the great super-power stations of the Florida Power & Light Company is located, has been completed into this city. A large force of linemen have completed the wiring from the super-plant to this city.

Miss Beulah Raulerson, eldest daughter of Mr. and Mrs. L. M. Raulerson, and Thomas Pitts were married Saturday afternoon at the home of the bride's parents on South Parrott avenue, Rev. F. L. Crowson officiating. The popular couple left immediately for a short wedding trip to various points within the state. The groom is one of the tilters at the Peoples Bank.

OKEECHOBEE

OKEECHOBEE, Aug. 30.—Ed Covell, with the assistance of Ben Anjima, gave the hotel a new metal roof during the past week.

The constantly rising water on the south shore of the lake, with the difficult plans of getting back and forth, have forced Ira Jackson to move to town from his place one and a half miles west of the Bolles canal.

For some reason mail missed reaching this office last Wednesday and Thursday.

The desired air service marker was replaced by Ben Anjima, given two coats of white paint, and its position reported to the Florida Highway Corporation. The operating airman showed his appreciation recently by a low flight, a waving of hand and the toss of a bouquet of forget-me-nots.

Sam Copper, V. W. Roth and Ed Covell visited the pumping station north of South Bay in the latter's boat last Friday. The two Fairbanks-Morse engines and the pumps, now being tested during a thirty day trial run, are working smoothly and efficiently. It will, however, take some time before the water level of the 9000 acres in the triangle can be perceptibly lowered under present conditions, it seems.

The contractor, Chas. H. Corbett, from Fort Lauderdale, who has the job of moving Baker's store from off the drainage district canal right of way, brought up the necessary timbers and five negroes the fore part of the week. The work, however, had to be postponed until conditions in the Everglades are once more normal, unless the Everglades drainage district board considers the regular annual inundation a state of "normalcy," and sees to it that we don't miss it.

From reading in our different Florida newspapers of the wonderful prosperity of our state in general, and the Everglades in particular, one is forced to the conclusion that editors as well as correspondents, have taken a post graduate course in the school of Ananias.

PEOPLE WE KNOW

Having finished with the peach deal, L. Lane Moore went from Georgia last month to his home in Pitman, N. J., where his address is 334 West Avenue. He expects to return to Canal Point and Pahokee this fall.

Fred Taylor, who farmed and bought vegetables here last winter, is due to arrive in Canal Point shortly. He spent the summer at his home in Ripley, N. Y.

Mr. James, who farmed the Soling land at Miami canal last season, will farm there again this winter. It is understood, although he said in the spring that he was done with vegetables in the Everglades.

GLADES COUNTY

Circuit Court—Circuit court will convene in Moore Haven September 6. Relative of Washington, J. W. Cheves and family, of Petersburg, are on a visit to this city. Mrs. C. J. Blake of Tasmania, Mr. Cheves is the fourth generation of George Washington (our nation's first president). Mrs. Blake owns silverware that was once used on George Washington's table.

Acre of Corn—A. Little of Moore Haven received word a few days ago from his nephew, Willie Smith, stating that he would arrive soon to put in forty acres of corn. Mr. Smith has been in Moore Haven several times and is well pleased with the soil and its wonderful production.

At Hall City—One train a week in 1924; last year, a freight every other day; this year, June 1, a freight came every day, and since July 1, a coach put on for passenger service and pouch mail all the way to Immokalee since August 1.

Schools Open—All schools of Glades county, opened for the 1926-27 session on Monday, August 30, except the Moore Haven school, which had registration day on Saturday, August 28. The teachers in the rural schools are: Mrs. W. C. Taylor, Bee Branch; Miss Bertha Howard, Lucky Island; Mrs. M. B. Jackson, Tasmania; Miss Ethel Pore, Palmide; Mrs. O. C. Head, Bear Beach.

MOORE HAVEN

Rec'd Phillips leaves Friday for military school in Oxford, Ga.

Mrs. W. E. Wainwright and daughter left last Monday going to Lake Butler for a vacation.

C. M. Allen has charge of one of the pumps for the Sugarland drainage district at Clewiston.

Misses Lynette and Joy Willingham are spending the week with their sister Mrs. J. E. Frierson, in Lakeland.

J. E. Frierson, commissioner of district No. 1, has done a good deed this week. He has had the road to Clewiston graded.

State Engineer Fred Flanders is having the weeds and grass cut around the state-house property. It sure looks splendid.

Mr. and Mrs. W. F. Farrington and son Hugh, returned from a nice trip through the western states last week. They drove 12,000 miles and report a splendid trip.

Rev. C. H. Dow is planning to build a new residence on his Baker highway property in the near future. This ten acre tract he bought in the spring. He has a new garage and driveway completed.

Fred Henriksen has completed the window frames for the Stonerest hotel and has them in place now. Mr. Henriksen is the business manager. He says the third story of the Stonerest hotel is now all plastered and work going ahead on other parts of the building.

Ed Brannan and family who went to Texas last spring, Mr. Brannan to follow his business of buying watermelons and produce, and the family to visit relatives, have returned home in time to be here at the opening of school.

H. G. G. of Moore City, a former mayor of Moore Haven who still has considerable property interests here is in town this week looking after things.

THE COUNTY SEAT

(West Palm Beach)
Joe L. Earman, publisher and investment banker, told Ernest Amos to hurry up and appoint a receiver for the Palm Beach Bank & Trust Company and get the business settled. He cited the example of how the national bank of Palm Beach was handled. Amos told the Central Farmers Bank of West Palm Beach as receiver for the Palm Beach Bank & Trust Company, giving Earman quick action.

Complying with the request of the really bold city commission has cut brokers' license to \$100 and salesmen's to \$35.

Suit for non-payment of \$75,000 alleged due on promissory notes, was started by L. N. and Jennie M. Simon against the First Baptist church, the congregation's trustees and a special finance committee. The complainants allege neither the interest nor the principal has been paid on the notes and therefore seek to have a lien declared against the five lots in question in King's Court.

YOU MAY NOT UNDERSTAND

IT: NEITHER DO WE
The subscription for the paper was made in the Miami Herald of Sunday, August 29. It is printed here just as it was printed in the Herald.
Harrison E. Ryan, real estate broker, 1810 Meyer-Kiser building, yesterday closed a deal for the sale of two tracts of five acres each of the Palm Beach Banana Plantation, located along the line of highway No. 8 connecting with the Conners highway. This land is the brick back lot to the east of Lake Okeechobee, 27 miles west of West Palm Beach and 2 miles north of Canal Point. L. E. McCall of Washington, Ky., was the buyer. The land is said to be bank plant. "We are using 4,000 plants on the 10 acres. The purchase price was \$12,000. There are \$12,000 for the two tracts."

AROUND THE LAKE

Will the Mayaca Company put an electric light on its water tower? A light if maintained will make the tower a landmark. Effort to maintain an electric light at the top of the Moore Haven water tank was abandoned because for a reason not understood the filament of the globes burned out more frequently than in globes at lower elevation.

Cleve Arrington of Pahokee is getting his fishing outfit ready to go to work next week. The Levis brothers have taken over the Galloway & Dempsey outfit.

The two houseboats used by the engineering department of the F. E. C. Railway Company were brought back Saturday to West Palm Beach canal and are moored between the spillway and the tollhouse, where also are the two houseboats of the Pioneer Telephone Company's crews.

School Board and L.I.F.

Sold \$3,963,500 Land

TALLAHASSEE, Aug. 27.—A total of \$3,963,500.14 in cash has been received for lands sold by the Internal Improvement Fund and the school boards, according to a report by the land office for 1925 and up to June 30, 1926.

Swamp lands sold during this period yielded \$1,582,286.38 in cash, with \$4,681,492.12 secured by mortgages. An acreage of 37,702.30 acres was sold at an average price of \$108.385 per acre. Internal improvement land, proper, amounted to \$3,030.40 cash, and \$1,975.00 secured by mortgages. An acreage of 37,702.30 acres was sold at an average price of \$108.385 per acre for 12,005 acres was received for this land.

During this period 20,453.08 acres of school land were sold at an average price of \$78.85 per acre, bringing \$1,021,262.66 in cash and \$600,500.03 secured by mortgages.

The average price for sovereignty land was \$147.48, a total of 12,193.96 acres being sold for \$564,609.91 cash, and \$1,229,708.82 being received on mortgages.

Lake bottom land averaged \$187 per acre, bringing in \$160,940.57 cash for 3,376.22 acres, while \$1,139.95 was secured by mortgages.

For quit claims to oil and mineral rights the board received \$146.99 and \$84.39 was received for timber and serpentine leases.

Miscellaneous collections made for trespass and canal right-of-way during 1925 yielded \$4,872.12, while \$2,000.75 was received for certificates of the commissioner as to land records. A total of \$153,538.58 was paid in 1925 and up to June 30, 1926, on installment entries made prior to 1925, according to the report.

Meaty Cut No Figure in Old-Time Justice

The torturing of criminals on the wheel" is a very ancient form of punishment. In an "improved" form it was resorted to in Germany in the fourteenth century. The unfortunate victim was laid upon a very large cart fastened to the spokes, and in that position, as the wheel was turned around, his limbs were broken by successive blows with an iron bar. In France, where the wheel was used only to punish criminals of the most atrocious sort, the victim was first bound to the spokes, and in the form of a St. Andrew's cross—that is, two bars of equal length laid crosswise like an X. Grooves were cut transversely in these bars, above and below the knees and elbows, and the executioner struck the limbs of the victim eight blows so as to break them in these places. Sometimes he finished his work by striking the criminal two or three blows on the chest or stomach, which usually put an end to the sufferer's life, and therefore the so-called blows of mercy. The punishment of the wheel was abolished in France in the revolution. In Germany it was occasionally inflicted early in the last century for the crimes of treason and parricide.

Exposure a Factor for Window Plants

Results in window boxes are largely dependent upon the right flowers for the exposure. It is not possible to have window boxes at every window identical with those at every other window. The exposure is different, but they may harmonize.

For sunny locations use nasturtiums, verbena, sweet alyssum, petunia, pansy, cornflower, nasturtium and geranium; for shady places, nonflowering plants—the ferns, palms, English ivy, begonia, trailing arbutus, and paragonia sprengeri. Drooping effects may be had from lobelia, sweet alyssum and others. For half shady windows, hanging fuchsia with bush fuchsia, or bush fuchsia with marguerites and vincas or hanging petunia with cobaea scandens, or pink fuchsia, white nasturtium and vincas can be combined. Verbenas may be planted alone as they form a luxuriant mass of bloom and foliage. Pansies and sweet alyssum are a delightful combination.

Geraniums and English ivy are for good and go well in a formal house or along a dusty street which would thwart the growth of something more delicate. Very effective results may be had by trailing ivy upon a heavy cord to frame the window.—The Delineator.

Savages at Feast

The natives of Abyssinia are very fond of raw meat, but as such a diet is attended by considerable cost it is not so frequently indulged in and the result is that bread is the mainstay of the people.

Occasionally a carcass is secured and a feast is indulged in by a number of persons who consume it entirely without cooking or any other preparation. The carcass is cut up and each of the participants takes a piece with a bone attached. Squatting on his haunches he holds the piece by the bone and makes a cut with a sharp knife.

The partially severed piece is then taken in the teeth and finally severed with an upward movement of the knife. As one witnesses the operation it would seem that there was danger of severing the nose of the diner.—Chicago Journal.

Love us, Delirium

People in love are not happy, but they always think they are going to be. Being in love is a delicious process of gathering together all imagined happiness. Millions of people say that some other human being is the sum of them. You will be happy when you get it. The conclusion is almost mathematical. Millions of young people arrive at it, just as we did. When we were married we would be happy ever after. The number of persons who are not happy, though married, should have suggested to us that there was a flaw somewhere in our reasoning. But it didn't.—Rosa Wilder Lane, in Hearst's International Cosmopolitan.

Friendship

Perfect friendship is that of good men who resemble each other in virtue; for these, as good themselves, are equal in their desire of good things for one another, and they desire good things for their friends, not for themselves, but for the sake of these things. For they value them for what they are and not for something accidental. The friendship, therefore, of these men endures as long as they are good, for virtue is something stable. And each of them is good in himself, and also in relation to his friend, for good men are both good absolutely and useful to each other.—Aristotle.

Qualified

The animal trainer having been taken ill, his wife reported for duty in his stead.
"Have you had any experience in this line?" asked the proprietor of the circus, doubtfully.
"Not exactly in this line," replied the woman. "My husband manages the beasts all right, doesn't he?"
"He certainly does."
"Well, you ought to see how easily he manages him."

THE COUNTY

Lake Worth.—Giving a total of 3,000 horsepower in the Lake Worth municipal light and power plant, a 1,150 horsepower electrical engine has been purchased by the city from the De La Vergne Company, New York. The purchase price is \$22,000.

West Palm Beach.—Thirty days in jail and a \$30 fine was the sentence imposed upon H. Jenkins by Judge Harry Hauck in municipal court yesterday for causing an accident while driving an automobile under the influence of liquor.

FIRE WARDENS

An A. P. dispatch from Tallahassee under date of August 27 says B. E. Raulerson of Boca Raton and W. C. Lord of Belle Glade have been appointed deputy fire wardens of sub-district 12, Everglades drainage district.

DOUBLE TRACK ON F. E. C. MAIN LINE

Improvements Permit 11-Hour Schedule Jacksonville to Miami

JACKSONVILLE, Aug. 30.—Virtual completion of the immense program of expansion by the Florida East Coast railway was announced yesterday by H. N. Rodenbaugh, vice president, in attractive folders just issued by the railway.

Over three hundred and fifty miles of new second main line track have been placed in operation, including complete double-track route between Jacksonville and Miami. This has been built in accordance with the most modern standards of the railway, with crooked ties, heavy tie plates, rail fastenings and rock ballast.

By early fall the entire double-track main line of the railway will be equipped with up-to-date system of colored light automatic block signals, the last word in efficient railway train control. These not only incidentally increase safety of operation but as well the total capacity of the road, and make possible a high average of on-time performance.

At the expense of two million dollars a new double-track bridge has been completed over the John A. Comer at Jacksonville, the natural gateway to Florida. An unlimited number of trains may now be operated to and from this important point, and with the minimum delay. Many other bridges on the line have been rebuilt and double-tracked to promote greater safety and accommodate the increased traffic.

Shops Near Completion

The new miller repair shops, now nearing completion on the southern boundary of St. Augustine, are among the largest of their kind in the entire south, incorporating facilities for the complete repair of all classes of railway equipment. Other new repair shops have been established at divisional and main terminals.

Infinite freight terminals have been built at Bowden (South Jacksonville) and Hialeah (Miami). The capacity of the freight terminals at New Smyrna, Fort Pierce and West Palm Beach has likewise been materially increased. Many miles of new passing tracks have been established. With such facilities a large volume of freight may be expeditiously handled with practically no interference with the operation of passenger trains.

The motive power used on the Florida East Coast railway is all of the most modern oil-burning type, designed for speed, power and economy of operation. A total of ninety-five new locomotives have been purchased within the past two years. The use of oil exclusively as fuel does away with the common annoyance of dust and cinders, making this the route of greater travel comfort.

11-Hour Schedule

Limited trains may be scheduled only 11 hours between Jacksonville and Miami as compared with a former schedule of 13 hours under former operation. Plans for winter train service call for a further reduction in schedules. It is probable that the running time of main limited trains may be clipped to nine hours over the double-track route between Jacksonville and Miami.

During the month of June 1926, an on-time record of 97 per cent was attained in the operation of main line passenger trains. Of the 430 trains operated during this period, 419 arrived at terminal points on schedule time. Four northbound trains maintained a record of 100 per cent on-time performance. This is a striking evidence of the new type of east coast transportation resulting from improved facilities and greater efficiency of operation.

FARMING

The Miami Herald.

That the future of the Miami territory depends largely upon the development of the surrounding agricultural possibilities is the opinion of William R. Rennie of the Florida Real Estate Commission. This is also the opinion of a rapidly increasing number of other observers. The farms, largely undeveloped as yet, will form the solid foundation upon which the future prosperity and growth of this whole section will rest.

Because the lower east coast possesses superiority in one direction is no good reason why any of its resources should be neglected. In the matter of climate, winter and summer, the region is not equaled anywhere else in the world. This will always be the haven of those who desire to escape the unpleasant winters of the northern part of the country. This fact in itself is enough to insure continual progress. But there is no reason for being content with the progress which will come from this one factor.

A considerable portion of this whole territory has been laid out in subdivisions. This does not mean that it is not available for agriculture. In fact, many of them are just as available for that purpose as before the stakes were set. South of Miami are thousands of acres of very rich soil. West of Miami in the reclaimed Everglades, are many more thousands of acres of soil as rich as the valley of the Nile.

On these acres it will be possible to raise winter fruits and vegetables to feed the nation. It will be possible to raise on them all the products that will be required to supply the needs of the hundreds of thousands of

people who come here every year. There is nothing more foolish than shipping fruit, vegetables, dairy products, eggs, chickens, beef, from other sections to southeast Florida. All that will be needed here can be raised here, giving employment to thousands of people and making it possible for them to live the entire year under the most comfortable conditions.

There was a time when there was no great profit in raising truck for shipment. Transportation facilities were so poor that such truck could be marketed profitably, even under the most favorable circumstances. At the present time this difficulty is being rapidly overcome. It will be possible for this section to supply the winter needs of the north at a profit to the growers. Nearest to the market gives an advantage that cannot be overcome by any other territory. It would be the height of folly for Miami to fail to take advantage of its obvious opportunities along agricultural lines.

Mexico Is Market For Products From Glades

MIAMI, Sept. 1.—Potentialities of foreign trade as it directly affects Miami have been the subjects of research by several of the larger banks of this city and yesterday a portion of a report outlining the Mexican market for foodstuffs, was brought to the attention of financial executives.

Statistical data compiled by the bureau of foreign and domestic commerce, United States Department of Commerce, formed the basis of the report, which was given in a particularly interesting form to Florida producers.

"The Mexican market for foodstuffs has a pronounced characteristic in the variety of products imported to the commerce reported station. The variety of imports is noteworthy, not only individual items making up a large percentage of the total imports, and makes Mexico second only to Cuba in Latin America as a market for American foodstuffs.

Practically every item in the foodstuff classification making up the export total of the United States goes to some extent to Mexico.

"This great market is in our backyard and it is our belief that a direct endeavor should be made to intensify Mexican trade through Florida ports which will give us the same relationship to that market that the ports of Los Angeles, San Francisco and Seattle have with the Orient respectively.

From a map included in the report it is ascertained that the principal Mexican ports are about equidistant from Miami as the centers of population of the northern Atlantic coast of the United States. This is graphically shown that Miami has the potential markets for large country in two distinct fields, a fact that has rarely been mentioned except in inclusive terms such as "Central and South America."

Showing how the products of Florida may be used for Mexican export trade the department of commerce statistics furnish several classifications of foodstuffs that may be produced in abundance in this state. The following figures were the United States to Mexico in 1924.

The value of dairy products and eggs shipped from this country to Mexico was \$2,091,000; cash crops valued at \$1,420,000; fresh fruits exported to Mexico was valued at \$499,000; dried fruit, \$306,000; the valuation of vegetables was \$382,000 and fish \$202,000.

Turks Nail Speeders, Give 50 Lashes Also

L. A. Sciope, Dean of Engineering Roberts College, Constantinople, Turkey, is a graduate of Purdue University, class of 1908. In a recent article in the "Purdue Alumnae," he describes certain Oriental customs. His description of the methods used to check motor vehicles speeding follows:

"Automobiles have become quite numerous, the greater number of which are American made. New speed regulations have been given into law during the last three weeks, making seven miles the limit within the city. Traffic police are stationed at various places where the temptation to exceed the limit is greatest, and these are armed with a board some five feet long with 4-inch spikes. Whenever a car is seen coming at rather lively pace the board is quickly placed in the road directly in front of the car. If the chauffeur succeeds in stopping before the car is seen coming at rather lively pace the board is quickly placed in the road directly in front of the car. If the chauffeur succeeds in stopping before the car is seen coming at rather lively pace the board is quickly placed in the road directly in front of the car. If the chauffeur succeeds in stopping before the car is seen coming at rather lively pace the board is quickly placed in the road directly in front of the car.

"Having lived and farmed in the Glades for five years I know where the best land is. Get in touch with me before buying elsewhere. I will treat you square—F. H. Friedman, Licensed Broker, Chosen, Fla.

THE CLEWISON IDEA

RECLAMATION

Clewiston and Clewiston Farms represent the most notable sub-drainage project with water control for agriculture in Florida.

INDUSTRY

Clewiston, planned for a model city from the standpoint of health and beauty and desirability as a place to live, has a great industrial program that will make it also a "Payroll City," where prosperity is not seasonal, but permanent.

AGRICULTURE

Clewiston Farms land, covering thousands of acres, is largely made up of the black mud soil that is making the southern rim of Lake Okeechobee famous. Experts have declared this soil, after reclamation, to be the richest in the known world available for cultivation.

TRANSPORTATION

Clewiston is approximately 65 miles from either Fort Myers or West Palm Beach on the Emory Trail cross-state highway route No. 25) now nearing completion. It is also the terminus of the Atlantic Coast Line Railway's Haines City Division.

Study these great facts that surely build prosperity and that make Clewiston the Keystone of the New Empire of Central South Florida. Come and see Clewiston and Clewiston Farms for yourself to learn how thoroughly the foundations are laid for carrying out "The Clewiston Idea."

And don't forget that Clewiston also has the Famous Florida Climate
